

MANUSCRIPT REVISION CHECKLIST

Note: this is just a convenient checklist, and should not be used without first consulting the full [Manuscript Guidelines](#) that go into more detail on the points below.

Regular Articles

- Please submit revised manuscripts on CD or via e-mail (if less than 10 megabytes). Please submit all figure plates and figures as individual TIF files with high resolution.
- Do not cite references in the abstract. After the abstract, provide 4-6 Key Words that are not used in the title.
- Indicate, **in bold**, new genus, new species, new synonymy, new combinations, new status, and other formal taxonomic changes in the abstract.
- List the authority of all genus-group and species-group names in the abstract. Abbreviate Linnaeus as L. and Fabricius as F. Do not abbreviate other authority names.
- Do not use proportional spacing or justified right margin.
- Leave one space after periods and colons (except for ratios and time).
- Do not begin a sentence with an abbreviation.
- Numbers less than 10 should be written out; but for descriptions, use Arabic numerals throughout including single digit ones.
- Measurements should be carried to same decimal, *e.g.* 6.0-6.4, not 6-6.4.
- Illustrations must all be referred to in the text, *e.g.*, "tarsal claws (Fig. 1)" or "tarsal claws as in Fig. 1."
- Indicate the systematic position of taxa in the title, *e.g.*, (Coleoptera: Cleridae).
- The first mention of the scientific name of a plant or animal in the text itself must include the name of the authority. Abbreviate Linnaeus as L. and Fabricius as F. Do not abbreviate other authority names.
- Spell out the entire scientific name the first time it is mentioned in the text; thereafter, abbreviate the genus name, except when it begins a sentence.
- Do not write the name of a species-group taxon anywhere that is not preceded by the name of the genus or its initial.
- Cite references in text as follows: Spangler (1991) or (Spangler 1991) for one author, Wood and Bright (1987) or (Wood and Bright 1987) for two authors, Orbach *et al.* (1995) or (Orbach *et al.* 1995) for three or more authors. Citations in chronological sequence should be separated by a semicolon (Smith 1965; Johnson 1989). A sequence of references from the same author should each be separated by a comma (Smith 1947, 1955; Johnson 1989).
- References should be cited as "In press" only after they have been accepted for publication; list the year of expected publication and end the citation under References Cited with "(In press)."
- Names of persons who provide unpublished information should include initials, *e.g.*, F. G. Werner, personal communication or *in litt.*
- Spell out the complete names of the titles of periodicals in the References Cited.

- Cite books, monographic series, articles in periodicals and contributions to books as follows:

Crowson, R. A. 1981. The Biology of the Coleoptera. Academic Press, London, UK.

Wood, S. L., and D. E. Bright, Jr. 1987. A catalog of the Scolytidae and Platypodidae (Coleoptera), Part 1: Bibliography. Great Basin Naturalist Memoirs, No. 11. Brigham Young University, Provo, UT.

Orbach, E., L. Bartolozzi, and A. Sforzi. 1995. A new Afrotropical species of *Rhinopteryx* Lacordaire (Coleoptera: Brentidae). The Coleopterists Bulletin 49(1): 17-22.

Spangler, P. J. 1991. Haliplidae (Adephaga) [pp. 311-312]. *In*: Immature Insects, Volume 2 (F. W. Stehr, editor). Kendall Hunt Publishing Company, Dubuque, IA.

Lingafelter, S. W., and E. H. Nearn. 2008. Cerambycidae holotypes of the Smithsonian Institution (USNM). Available from: www.elaphidion.com/ (Accessed on 13 January 2010).

Scientific Notes

- Organize Scientific Notes by title, authors name(s) and address(es), text, Acknowledgments, and References Cited.
- Do not include an Abstract or Key Words.
- Scientific Notes should not exceed four (4) text pages.

Website References

- Websites referred to in the manuscript must be pertinent and accessible to the editor.
